SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
IBM SPSS 22.0 was used for the analysis of the data and the Independent Samples Student t test was used for the analysis of independent and normally distributed variables (the correlation between NRS scores and BMI).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
IBM SPSS 22.0 was used for the analysis of the data and the Independent Samples Student t test was used for the analysis of independent and normally distributed variables (the correlation between NRS scores and BMI).	t test
Additionally, Mann-Whitney U test was used to analyze the non-normally distributed independent variables (the correlation between NRS scores and age, waist circumference).	Mann-Whitney U test
Chi-square test was used to compare categorical variables (the correlation between gender and HbA1c, of NRS scores, educational, and employment status).	Chi-square test
Pearson correlation test was used to determine the relationship between quantitative variables (correlation between NRS scores and age, HbA1c, tobacco and alcohol consumption).	Pearson correlation test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
