SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Measurements for both methods were discarded when the R 2 of the linear relation of pCO2 inside the chamber over time was lower than 0.9.
Attrition
Three measurements were carried out for each location.
Sex as a biological variable
The intakes of both dams are above the hypolimnion , at a depth of about 15 to 20 m .
Subject Demographics
Age: not required.
Weight: not required.
Randomization
During each of the 10,000 iterations, we computed the arithmetic mean of emission values that were randomly resampled (with replacement) from the artificial datasets.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Recombinant DNA			
Simultaneously , water samples were collected from different depths to determine the pCH4 using the headspace extraction method (27) .	pCH4		Suggestion: RRID:Addgene_217331(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analyses Mann-Whitney U tests (two-sided) were used for comparisons between fluxes due to the non-normal distribution of the obtained data.	Mann-Whitney U tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
