Document Identifier: **PMC8238023**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Study approval This study was approved by the Indiana University institutional review board (IRB 1707525204).
Consent: Written informed consent was obtained from a parent or a legal guardian of each participant and written assent from the participant (>14 years of age).
Inclusion and Exclusion Criteria
Study participants All patients aged 8-17.9 years of age undergoing PE and PSF surgeries were eligible for the study.
Attrition
Eight SNPs were included in the final analyses (rs4803419, rs2279344, rs1038376, rs10500282, rs11882424, rs2279342, rs2279343, rs8100458).
Sex as a biological variable
not detected.
Subject Demographics
Age: Written informed consent was obtained from a parent or a legal guardian of each participant and written assent from the participant (>14 years of age).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Data Information	
Identifiers: These included rs4803419, rs2279344, rs1038376, rs10403955, rs10500282, rs10853744, rs11882424, rs2279342, rs2279343, rs2279345, rs3745274, rs707265, rs7250601, rs7250991, rs8100458 and rs8192719.	rs4803419
	rs2279344
	rs1038376
	rs10403955
	rs10500282
	rs10853744
	rs11882424
	rs2279342
	rs2279343
	rs2279345
	rs3745274
	rs707265
	rs7250601
	rs7250991
	rs8100458
	rs8192719
Protocol Information	
Identifiers: This study was registered at clinicaltrials.gov (NCT03495388 Date of registration: 28 March 2018) prior to enrollment.	NCT03495388

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Poisson regression was used to investigate SNP associations for PONV.	Poisson regression
Since we used eight SNPs for our final analysis, we used a Bonferroni correction for multiple comparisons for the primary outcome measure, which yielded a significance threshold of p = 0.00625 (p = 0.058 SNPs).	Bonferroni

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
