# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| IRB: This study was approved by the Ethics Committee of Changzhi Peoples Hospital (Changzhi, China), and written informed consent for their data to be used was obtained from all of the patients. |
| Consent: This study was approved by the Ethics Committee of Changzhi Peoples Hospital (Changzhi, China), and written informed consent for their data to be used was obtained from all of the patients. |
| Inclusion and Exclusion Criteria |
| not detected. |
| Attrition |
| Ultimately, 270 patients meets the inclusion criterias. |
| Sex as a biological variable |
| not detected. |
| Subject Demographics |
| Age: not detected. |
| Weight: not detected. |
| Randomization |
| not detected. |
| Blinding |
| not detected. |
| Power Analysis |
| not detected. |
| Replication |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| 20.0 ( IBM , New York) , IBM SPSS Statistics has been used to perform all statistical analysis . | SPSS | | Suggestion: SPSS, RRID:SCR_002865( link) |
| The appropriate cut-off points of NLR , PLR and OPNI were analyzed using X-tile version 3.6.1 ( | X-tile | | Suggestion: X-Tile (RRID:SCR_005602)( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| Overall survival analysis was performed by Kaplan-Meier method, and log-rank test was performed to compare the differences between groups. | log-rank test |
| The analysis between OPNI and clinicopathological characteristics was analyzed using either the Chi-Squared test or Fishers exact test. | Chi-Squared test |
| | Fishers exact test |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
