SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the Institutional Ethics committee of both Sri Ramachandra Institute of Higher Education and Research, Chennai and G.S.L. Medical College and Hospital, Rajahmundry, in accordance with the declaration of Helsinki.
Consent: After getting written informed consent from all study participants, they were included in the study.
Inclusion and Exclusion Criteria
Pregnant women, individuals with hypertension, alcoholics, smokers, and individuals on ACE or ARB drugs, were excluded from the study.
Attrition
Based on urinary albumin excretion, the cases were categorized into three groups: Normoalbuminuria (Group II, n = 45), Microalbuminuria (Group III, n = 40) and Macroalbuminuria (Group IV, n = 40).
Sex as a biological variable
The study participants were in the age group of 45 to 60 years of both sexes.
Subject Demographics
Age: The study participants were in the age group of 45 to 60 years of both sexes.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The statistical analyses were performed with SPSS software version 13.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Since the data were found to follow normal distribution by Kolmogorov Smirnov test, the data were expressed as mean and SD.	Kolmogorov Smirnov test
Comparison of data was done by ANOVA.	ANOVA
Tukey post-hoc test was done to analyze statistical significant difference between the groups.	Tukey post-hoc test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
