SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Data Collection After receiving the Institutional Review Board (IRB) approval from King Abdullah International Medical Research Center (KAIMRC), the researchers distributed the questionnaire to nursing students who agreed to participate in the study during their break time.
Consent: The researchers obtained participants informed consent to participate in the study and assured data privacy and confidentiality.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
Also, we applied Regression analysis (R2) to test the predictive power of the independent variable (AEA) on the dependent variable (MS).
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data Analysis The researchers analyzed the data using the Statistical Package for Social Sciences (SPSS).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The data was tested for normal distribution using the Shapiro-Wilk test.	Shapiro-Wilk test
The researchers used frequencies and percentages to describe the demographic characteristics, descriptive statistics (means and standard deviation) to summarize the results, Analysis of Variance (ANOVA) to compare means, and Pearsons correlation to assess the relationship between studied variables.	Analysis of Variance
	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
