SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The institutional review board at Weill Cornell Medicine approved this study.
Inclusion and Exclusion Criteria
Recipients who were underweight (BMI <18.5 kgm2), were in similar BMI categories as the other paired recipient, had a transfer using frozen-thawed oocytes or embryos, had PGT-A performed, had uterine factor infertility (Asherman syndrome or history of myomas), or severe male factor infertility (azoospermia or other abnormal parameter necessitating the surgical retrieval of sperm) were excluded from the study.
Attrition
not detected.
Sex as a biological variable
Recipients who were underweight (BMI <18.5 kgm2), were in similar BMI categories as the other paired recipient, had a transfer using frozen-thawed oocytes or embryos, had PGT-A performed, had uterine factor infertility (Asherman syndrome or history of myomas), or severe male factor infertility (azoospermia or other abnormal parameter necessitating the surgical retrieval of sperm) were excluded from the study.
Subject Demographics
Weight: The two recipients of the sibling-oocytes were paired and categorized based on BMI: group A (normal weight, BMI 18.5-24.9 kgm2) and group B (overweightobese, BMI >25.0 kgm2).
Age: Titration of estrogen patches and progesterone doses were made based on measured serum levels, with adjustments of doses as deemed necessary, and continued until 10-12 weeks of gestation.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Analyses were implemented in SPSS Version 26 (IBM Corporation, Armonk, NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis included paired t-test, kh2 test, and Fishers exact test.	t-test
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
