SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study procedure involved an online survey and was approved by the Human Research Committee of the Childrens Health Queensland Hospital and Health Service (HREC20QCHQ63632) and registered by the University of Melbourne Medicine and Dentistry HESC (ID 2057001).
Inclusion and Exclusion Criteria
not detected.
Attrition
The qualitative data of N = 399 children between 3 and 5 years (M = 4.41 years, SD = 0.82 51.6 female) were included in this analysis.
Sex as a biological variable
The qualitative data of N = 399 children between 3 and 5 years (M = 4.41 years, SD = 0.82 51.6 female) were included in this analysis.
Subject Demographics
Age: Participants Participants were caregivers of young children (aged 1-5 years) who were able to complete the online survey in English.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information

Identifiers: The study procedure involved an online survey and was approved by the Human Research Committee of the Childrens Health Queensland Hospital and Health Service (HREC20QCHQ63632) and registered by the University of Melbourne Medicine and Dentistry HESC (ID 2057001).	HREC20QCHQ63632

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
