SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: MATERIALS AND METHODS Our study protocol was approved by the Institutional Review Board of the Chongqing Medical University (approval number: Keyan 2020002) and was registered on the Chinese Clinical Trial Registry (registration number: ChiCTR2000030970).
Consent: Informed consent was waived owing to the studys retrospective nature.
Inclusion and Exclusion Criteria
Meanwhile, patients with multiple masses on the same side or those who underwent surgery via a transperitoneal approach were excluded from this study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
STATA version 15.1 software (Stata Corp., College Station, TX, USA) was used for data analysis.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Chi-squared and Wilcoxon signed rank tests were used to compare the differences between categorical and continuous variables, respectively.	Chi-squared
	Wilcoxon signed rank tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
