Document Identifier: **PMC8246616**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Patients provided written consent and the study was approved by a central ethics committee (Haga Hospital) and by the ethics committees of participating hospitals.
IRB: Patients provided written consent and the study was approved by a central ethics committee (Haga Hospital) and by the ethics committees of participating hospitals.
Euthanasia Agents: Dietary covariates (g/d) were derived from the FFQ and the following food groups were composed: fruits , vegetables , whole grains , refined grains , red meat , processed meat , sugar-sweetened beverages , coffee (caffeinated and decaffeinated) , tea , fish , and sodium .
Inclusion and Exclusion Criteria
Patients with incomplete dietary data (n = 453) or implausibly high or low energy intakes (<800 or >8000 kcal/d for men, <600 or >6000 kcal/d for women; n = 19) were excluded, leaving a total of 4365 patients.
Attrition
One patient was lost to follow-up and censored after 2.9 y .
Sex as a biological variable
Alcohol consumption (g/d) was derived from the FFQ and categorized into 4 categories of drinkers: abstainers , light (>0 to ≤10 g/d for men and >0 to ≤5 g/d for women) , moderate (>10 to ≤30 g/d for men and >5 to ≤15 g/d for women) , and heavy (>30 g/d for men and >15 g/d for women) .
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Statistical analysis Missing data (all at random) were imputed using the age- and sex-specific mode for physical activity (n = 25) and smoking status (n = 1) and the age- and sex-specific median for BMI (n = 6) .
Blinding
not detected.

Power Analysis	
not detected.	
Replication	
not required.	
Cell Line Authentication	
Authentication: Physical activity was assessed by the validated Physical Activity Scale for the Elderly (25) and categorized in 2 categories: no activity or only light activity [<3 metabolic equivalent tasks (METs)] and 0–7 d/wk of moderate or vigorous activity (>3 METs)	
Protocol Information	
Identifiers: Methods Study design This current study makes use of the AOC (NCT03192410) in the Netherlands.	NCT03192410 Warning: study registration date June 10, 2017 is after study start date April 2002

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using the statistical software SAS version 9.4 (SAS Institute Inc .)	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Pearson correlation coefficient for energy intake was 0.83 for the FFQ compared with a dietary history measured over the same period (20).	Pearson correlation
Spearman correlation coefficients for the reproducibility of 2 measurements of the FFQ were 0.69 for cheese and 0.80 for milk, yogurt, and custard combined (	Spearman correlation
The Wald chi-square statistic was used for testing interaction .	chi-square statistic
The Wald chi-square test was carried out for testing nonlinearity of the relations (28) .	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
