SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Finally , a symmetric identical by state matrix was created with PLINK to identify any potentially related individuals .	PLINK		Suggestion: PLINK (RRID:SCR_001757)(link)
Individual-based PCA was performed for a genlight object through the function glPca in the R package Adegenet v2.1.1 , and the s .	Adegenet		Suggestion: ADEGENET (RRID:SCR_000825)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Samples with more than 10 missing genotypes (genotype call rate <90) , and SNPs with minor allele frequency <0.01 and deviation from Hardy-Weinberg equilibrium with Fishers exact test (p-value < 10-6) were filtered and not used in the downstream analysis .	Fishers exact test
Differences of inbreeding levels among populations were tested using Kruskall-Wallis tests.	Kruskall-Wallis tests
Pairwise comparisons were performed with Wilcoxon tests using R version 3.6.3.	Wilcoxon tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
