SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: The experimental procedures were approved by the University of New England Animal Ethics Committee, Australia (Approval number:
Euthanasia Agents: Gastrointestinal Tract pH On d 14 and d 35, two birds per pen were randomly selected, weighed individually and euthanized by electrical stunning followed by cervical dislocation.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Upon arrival, birds were weighed and randomly distributed into 48 floor pens (120 cm length x 77 cm width), with ten birds per pen, bedded on clean wood shavings.
Blinding
not detected.
Power Analysis
not detected.
Replication
Ileal Digesta Viscosity Ileal digesta viscosity was measured in triplicate for each pen.

Number: Ileal Digesta Viscosity Ileal digesta viscosity was measured in triplicate for each pen.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis Statistical analysis was performed using Minitab (version 18.1, 2017 Minitab Inc., US).	Minitab		Suggestion: Minitab, RRID:SCR_014483(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Data were tested for normality using the Anderson-Darling test.	Anderson-Darling test
Tukeys multiple range tests was used to determine the differences between individual treatment means when interactions were observed.	Tukeys multiple range tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
