Document Identifier: **PMC8254606**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Institutional Review Board (IRB) was waived by Royal Surrey County Hospital because of its retrospective nature, clinical purpose and no procedure is required.
Consent: Informed Consent was obtained from all participants prior to the study.
Inclusion and Exclusion Criteria
We excluded patients who received neo-adjuvant, adjuvant therapy, hormonal or radiation therapy.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

Authentication: All specimens were completely sectioned and examined histologically, and for each specimen, the percentage of tumour was estimated by visual inspection and for each slide of prostate the percentage of the area occupied by tumour was estimated.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
According to the American Urological Association (AUA),35 BCR was defined as a PSA value >=0.2 ngmL followed by a subsequent confirmatory value >=0.2 ngmL.	American Urological Association		Suggestion: American Urological Association (RRID:SCR_005859)(link)
All analyses were performed using Stata version 14 (StataCorp, College Station, Texas).	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Chi-square test or the Fishers exact test and paired t-test were calculated for categorical and continuous variables, respectively.	Chi-square test
	Fishers exact test
	t-test
One-way ANOVA was used to assess the correlation between the tested parameters.	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
