SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics	
IRB: This retrospective study was approved by the Institutional Review Board (IRB) of Asan Medical Center (AMC IRB 2019-1308) .	
Inclusion and Exclusion Criteria	
Of these , intramedullary tumors originating from the conus medullaris or metastatic tumors were excluded.	
Attrition	
not detected.	
Sex as a biological variable	
not detected.	
Subject Demographics	
Age: not detected.	
Weight: not detected.	
Randomization	
not detected.	
Blinding	
not detected.	
Power Analysis	
not detected.	
Replication	
not required.	
Data Information	
Identifiers: During the propofol maintenance of anesthesia , an MEP amplitude decrement of > 50	10,12,13

of the baseline value was considered indicative of a significant change provided that the levels of neuromuscular blockade and general anesthesia were unchanged 10,12,13 .	

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
We used IBM SPSS Statistics ver .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Student t-test or Mann-Whitney U-test was used to compare continuous variables , and the Pearson chi-square test or Fisher exact test was used to compare discrete variables of the groups .	t-test
	Mann-Whitney U-test
	chi-square test
	Fisher exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
