Document Identifier: **PMC8256281**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The protocol was approved by the institutional review board of Seoul National University Bundang
Consent: Hospital (IRB no. B-1804-465-105) with waiver of informed consent .
Inclusion and Exclusion Criteria
Patients were aged >=18, and those who had previously experienced severe adverse reactions such as SJS or TEN were excluded from the rechallenge.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All the analyses were performed using SPSS version 18.0 (SPSS Inc., Chicago, IL, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analyses Comparisons of continuous variables between groups were performed using Students t-test.	t-test
The categorical variables were analyzed using Fishers exact test and the chi-square test.	Fishers exact test
	chi-square test
To analyze the odds ratio of clinical variables for complete remission, a binary logistic regression test adjusted for age, sex, and severity grade of the previous reaction was performed.	binary logistic regression test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
