SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Institutional ethics committee (IEC) approval was obtained before the commencement of study.
Consent: Written informed consent was taken from each patient in both of the groups after they were provided with a detailed information sheet for participating in the study .
Inclusion and Exclusion Criteria
Inclusion criteria Adult patients belonging to ASA grade 1 status , posted for elective abdominal laparoscopic surgeries of estimated 2 - 4 h duration were included in the study .
Attrition
not detected.
Sex as a biological variable
Methodology The study was conducted among 50 ASA grade 1 adult patients belonging to both sexes and of age group between 18 - 50 years, undergoing elective abdominal laparoscopic surgeries, under general anesthesia.
Subject Demographics
Age: Methodology The study was conducted among 50 ASA grade 1 adult patients belonging to both sexes and of age group between 18 - 50 years, undergoing elective abdominal laparoscopic surgeries, under general anesthesia.
Randomization
Materials and Methods This was designed as prospective, observer blind, randomized, interventional pilot study.
Blinding
Materials and Methods This was designed as prospective, observer blind, randomized, interventional pilot study.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The software SPSS (version 20.0) was used for analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For intra-group comparison (at the same time point, between the groups), Students t-test was applied.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
