SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: In compliance with the US federal regulation for institutional review board exemption 45 CFR 46 104 (2,i), once a response was accepted it was immediately and permanently anonymized.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
The authors were blinded as to the identity of the spine surgeon responding.
Power Analysis
not detected.
Replication
not required.
Code Information
Availability: The complete questionnaire is available as an appendix (available online).

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
To perform the exploratory analysis of demographic data, the statistic software Minitab 18 was used.	Minitab		Suggestion: Minitab, RRID:SCR_014483(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
To study the difference between variables, the nonparametric Kruskal-Wallis test was applied.	Kruskal-Wallis test
To test which pairs of groups were different, pairwise Wilcoxon rank-sum test was performed.	Wilcoxon rank-sum test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
