SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical considerations This study received ethical approval from the University of Calgary Conjoint Health Research Ethics Board (REB20-0117).
Consent: Participation in this study was voluntary, and informed consent was obtained from all participants prior to beginning the online survey.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Two independent investigators analyzed open-ended responses in duplicate using a deductive thematic approach to qualitative analysis.

Number: Two independent investigators analyzed open-ended responses in duplicate using a deductive thematic approach to qualitative analysis.
Data Information
Availability: Information on program requirements are available at the Cumming School of Medicine webpage.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Quantitative data were analyzed using STATA IC 15 (StataCorp.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)
	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Independent t tests were used to examine differences between dichotomized variables (e.g., visible ethnic minority, diagnosis of clinical disability).	t tests
To examine group differences (e.g., gender, learner program) we used an Analysis of Variance (ANOVA) with Bonferroni corrections to account for post-hoc analyses.	Analysis of Variance
	ANOVA
	Bonferroni

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
