Document Identifier: **PMC8265363**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Both studies were approved by an institutional review board, or equivalent, at each site, and all patients gave written informed consent before enrollment.
Consent: Both studies were approved by an institutional review board, or equivalent, at each site, and all patients gave written informed consent before enrollment.
Inclusion and Exclusion Criteria
not detected.
Attrition
In PALOMA-2, 666 patients were randomized 2:1 to receive either palbociclib (125 mgday, oral, 31 schedule) plus letrozole (2.5 mgday, oral, continuous) or matching placebo plus letrozole 4.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
In PALOMA-2, 666 patients were randomized 2:1 to receive either palbociclib (125 mgday, oral, 31 schedule) plus letrozole (2.5 mgday, oral, continuous) or matching placebo plus letrozole 4.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.	
Data Information	
Identifiers: DNA was genotyped using commercially available TaqMan assays (Applied Biosystems, Waltham, MA, USA) for two variants for ABCB1, rs1045642 (C___7586657_20) and rs1128503 (C_7586662_10) 2 variants for ERCC1, rs3212986 (C___2532948_10) and rs11615 (C___2532959_20) and one variant that tags the CYP3A7*1C allele (rs45446698 C_30634320_10).	rs1045642
	rs1128503
	rs3212986
	rs11615
	rs45446698

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using SAS v.9.4 (SAS Institute, Cary, NC).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
SNPs were tested for Hardy-Weinberg equilibrium in the Asian and non-Asian populations using a permutation-based exact test.	permutation-based exact test
The p values were calculated using the 2-sided log-rank test and not adjusted for multiplicity.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
