SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the ethical committee of Fukushima Medical University.
Consent: All patients gave written informed consent to participate in this study.
Inclusion and Exclusion Criteria
Exclusion criteria included (C) Patients with obvious history of peripheral artery disease and/or atrial fibrillation (including all types: paroxysmal, persistent, long-standing persistent, and permanent atrial fibrillation 15)); and (D) those who were receiving maintenance dialysis during the study period.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All analyses, except for the receiver operating characteristic curve analysis, were conducted using IBM SPSS Statistics version 26 (IBM, Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analysis All continuous variables analyzed in this study were non-normally distributed according to the Shapiro-Wilk test, and were expressed as medians (25th, 75th percentile).	Shapiro-Wilk test
Continuous and categorical variables were compared using the Mann-Whitney U test and the chi-square test, respectively.	Mann-Whitney U test
	chi-square test
We compared the occurrence of post-discharge stroke using the Kaplan-Meier analysis with log-rank test.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
