SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the national medical ethics committee (NL 31641.029.10 CCMO).
Consent: All children verbally agreed to participate, and written informed consent was obtained before participation from all parents and children aged 11 years and older.
Inclusion and Exclusion Criteria
Inclusion criteria for the ADHD group were as follows: (a) a primary diagnosis of ADHD as established by a child psychiatrist using the Diagnostic and Statistical Manual of Mental Disorders (4th ed., text rev.;
Attrition
Method Participants and Selection Procedure Participants were 58 children with ADHD and 58 TD children, aged 7 to 13 years.
Sex as a biological variable
Characteristics ADHD(n = 58) TD children(n = 58) Group M SD M SD F p Sex, % male 67 67 Age (years) 9.7 1.3 9.9 1.2 0.44 .
Subject Demographics
Age: Method Participants and Selection Procedure Participants were 58 children with ADHD and 58 TD children, aged 7 to 13 years.
Randomization
Three fixed pairs (AB, CD, and EF) were presented in a random order, and children had to learn to choose the stimulus that was associated most strongly with reward.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.	
Protocol Information	
Identifiers: Procedure The PLT was part of a larger assessment battery that was used as part of a treatment trial for ADHD (Ref. No. NCT01363544, https://clinicaltrials.gov/show/NCT01363544).	NCT01363544 Warning: study registration date May 20, 2011 is after study start date June 2010

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Organisms/Strains			
Three fixed pairs (AB, CD, and EF) were presented in a random order, and children had to learn to choose the stimulus that was associated most strongly with reward.	AB		Suggestion: RRID:BDSC_203(link)
Software and Algorithms			
Statistical Analysis Analyses were performed with Statistical Package for the Social Sciences version 18 (SPSS 18; IBM Corporation, Armonk, NY, USA).	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Group comparability in terms of background characteristics was analyzed using a chi-square (χ2) test or analyses of variance (ANOVAs).	chi-square (χ2) test
	analyses of variance
	ANOVAs
Learning phase To investigate group differences (ADHD vs. TD children) in learning performance, we compared (a) the number of learning blocks required to reach the entry criterion for the test phase using ANOVA and (b) accuracy and learning rate in the first block of trials (2–20) for the three reward probability conditions using generalized estimating equations (GEE) with an identity link function and an autoregressive, AR(1), working correlation matrix.	ANOVA
In the test phase, we compared groups on the overall percentage correct for the original pairs (AB, CD, and EF) using analysis of covariance (ANCOVA).	analysis of covariance
	ANCOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
