SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical Considerations The Ethics Committee of the Suez Canal University approved the study.
Consent: Written informed consent was taken from all students and they were assured of the confidentiality of their information.
Inclusion and Exclusion Criteria
The inclusion criteria were willingness to participate in the study through filling the questionnaire and registering in the medical education module.
Attrition
not detected.
Sex as a biological variable
An independent sample t-test was utilized to determine differences in learning styles and personality traits among both genders.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Cell Line Authentication
Authentication: It has been validated for measuring learning preferences.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data were analyzed using Statistical Package for Social Science (version 27, SPSS Inc., Chicago, IL) using descriptive and inferential statistics.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
An independent sample t-test was utilized to determine differences in learning styles and personality traits among both genders.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
