SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed written consent was obtained from each subject.
IRB: The experiments were conducted in accordance with the tenets of the Declaration of Helsinki and the protocol was approved by the local institutional ethics committee (medical faculty of the University Erlangen-Nurnberg).
Inclusion and Exclusion Criteria
Subjects with mild and severe cataracts, as established in slit-lamp examinations, were excluded.
Attrition
not detected.
Sex as a biological variable
Methods Subjects Twenty-one normal subjects (10 males and 11 females, mean age +- SD: 63.1 +- 11.6, age range: 45-80 years), and 44 primary open-angle glaucoma patients (26 males and 18 females, mean age +- SD: 65 +- 9.06, age range: 43-80 years) participated in the present study.
Subject Demographics
Age: Methods Subjects Twenty-one normal subjects (10 males and 11 females, mean age +- SD: 63.1 +- 11.6, age range: 45-80 years), and 44 primary open-angle glaucoma patients (26 males and 18 females, mean age +- SD: 65 +- 9.06, age range: 43-80 years) participated in the present study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
