SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The protocol used in this study was approved by the ethics committee board of Peking University First Hospital, Beijing, China (Approval No. 2020363) and complied with the Declaration of Helsinki 1975.
Consent: In addition, written informed consent from the patients or their relatives to participate in the study was obtained, and data were analyzed anonymously.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: (1) age between 18 and 75 years and (2) the start of NA treatment, without interruption, during follow-up.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: The inclusion criteria were as follows: (1) age between 18 and 75 years and (2) the start of NA treatment, without interruption, during follow-up.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis Data were analyzed using SPSS for Windows (version 22.0, IBM, Armonk, NY, USA) and R software for Windows (version 4.0.3, http:www.r-project.org).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	http:www.r-project.org		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Students t-tests or non-parametric tests were used for continuous variables, and kh 2 tests were used for categorical variables.	Students t-tests
	kh 2 tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
