SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods Patients The Institutional Review Board of the Chinese Peoples Liberation Army General Hospital, Beijing, China approved this retrospective study, which was conducted in accordance with the Declaration of Helsinki.
Consent: 4 UAE Embolization All the patients signed informed consent before the embolization.
Inclusion and Exclusion Criteria
The inclusion criteria for UAE were women with adenomyosis, with or without fibroids, suffering from heavy menstrual bleeding, dysmenorrhea, andor cycle-independent pain and bulk-related symptoms.
Attrition
Of the 27 women, 19 had pure AD, and eight had AD combined with fibroids, while 25 had diffuse AD, and two had focal AD.
Sex as a biological variable
Between February 2015 and January 2019, 27 women with a median age of 42 years (range 29-53 years) were evaluated, after presenting with pelvic pain, heavy menstrual bleeding, or bulk-related symptoms, or a combination of them.
Subject Demographics
Age: Between February 2015 and January 2019, 27 women with a median age of 42 years (range 29-53 years) were evaluated, after presenting with pelvic pain, heavy menstrual bleeding, or bulk-related symptoms, or a combination of them.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using SPSS 23.0 software for Windows (SPSS Inc., Chicago, Illinois, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
