Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.oio/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: page no/section/legend)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available	Yes, 3 antibodies detected, 0 RRID provided : Ki-67 : anti-mouse TNFa , : anti-TNFa Please add identifiers for all resources where possible	

Cell Materials	Yes (indicate where provided: page no/section/legend)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	No cell lines detected Please add identifiers for all resources where possible	
Primary cultures: Provide species, strain, sex of origin, genetic modification status.	Not currently checked by SciScore	

Experimental Animals	Yes (indicate where provided: page no/section/legend)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	Yes, 4 organisms detected, 2 RRIDs provided Suggestion: RRID:IMSR_JAX : C57BL6J : B6-Ly5.1Cr Suggestion: RRID:IMSR_JAX : C57BL6 : B6.129S2 (C)-Cxcr2 tm1Mwm J Please add identifiers for all resources where possible	
Animal observed in or captured from the field: Provide species, sex and age where possible	Not currently checked by SciScore	
Model organisms: Provide Accession number in repository (where relevant) OR RRID	See laboratory animals section for information.	

Plants and microbes	Yes (indicate where provided: page no/section/legend)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	Not currently checked by SciScore	
Microbes: provide species and strain, unique accession number if available, and source	Not currently checked by SciScore	

Human research participants	Yes (indicate where provided: page no/section/legend)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Sample acquisition was approved by the Institutional Review Board at the University of Alabama at Birmingham Hospital , in accordance with an assurance filed with and approved by the Department of Health and Human Services , and met all requirements of the Declaration of Helsinki.	
Provide statement confirming informed consent obtained from study participants.	All subjects signed an informed consent form .	
Report on age and sex for all study participants.	**Age:**EXPERIMENTAL MODEL AND SUBJECT DETAILS Human samples Samples were obtained from patients with CML (aged 40-65 years) in chronic phase (CP) without prior imatinib treatment seen at the University of Alabama at Birmingham Hospital.	

Human research participants	Yes (indicate where provided: page no/section/legend)	n/a
	Sex: Equal numbers of male and female subjects were used.	

Design

Study protocol	Yes (indicate where provided: page no/section/legend)	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.	Not detected.	

Laboratory protocol	Yes (indicate where provided: page no/section/legend)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	Not detected.	

Experimental study design (statistics details)	Yes (indicate where provided: page no/section/legend)	n/a
State whether and how the following have been done, or if they were not carried out		
Sample size determination	The sample size was estimated based on assumptions of one-sided Type I error of 0.05 and estimates of fold change and variance from preliminary data to have > 80 power to detect differences, if present, in our groups.	
Randomization	Mice of similar age were randomly divided into experimental groups .	
Blinding	Investigators were blinded to the mice genotype during treatments or monitoring survival.	
inclusion/exclusion criteria	not detected.	

Sample definition and in-laboratory replication	Yes (indicate where provided: page no/section/legend)	n/a
State number of times the experiment was replicated in laboratory	Not detected.	
Define whether data describe technical or biological replicates	Not detected.	

Ethics	Yes (indicate where provided: page no/section/legend)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Sample acquisition was approved by the Institutional Review Board at the University of Alabama at Birmingham Hospital , in accordance with an assurance filed with and approved by the Department of Health and Human Services , and met all requirements of the Declaration of Helsinki.	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	All mice were maintained in Association for Assessment and Accreditation of Laboratory Animal Care (AAALAC) specific-pathogen-free animal care facilities , and all procedures were carried out in accordance with federal guidelines and protocols approved by the Institutional Animal Care and Use Committee at the University of Alabama at Birmingham and Cincinnati Childrens Hospital Medical Center .	
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Not detected.	

Dual Use Research of Concern (DURC)	Yes (indicate where provided: page no/section/legend)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	Not currently checked by SciScore	

Analysis

Attrition	Yes (indicate where provided: page no/section/legend)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	For in vitro experiments , 20,000 FACS sorted CFSEmax LTHSC from normal mice (n = 8) and CML mice (n = 13) were plated in gelatin-coated 96-well plates in SFEM supplemented with 10ngml murine IL-3 , IL-6 , SCF , TPO either in the presence of sorted 6C3+ cells from normal or CML mice , or the indicated chemokines , CXCL1 (250ngml) , CXCL5 (250ngml) , combination with or without CXCR2i for 3 days at 37degC , 5 CO2 .	

Statistics	Yes (indicate where provided: page no/section/legend)	n/a
Describe statistical tests used and justify choice of tests.	. QUANTIFICATION AND STATISTICAL ANALYSIS Unless otherwise specified, all results obtained from independent experiments are reported as means +- standard errors of means (SEM) of multiple replicates, and statistical analyses were performed using unpaired, nonparametric Students t test or 2-way analysis of variance (ANOVA), adjusting for multiple comparisons (GraphPad Prism version 7.0, La Jolla, CA).	

Data availability	Yes (indicate where provided: page no/section/legend)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	All unique resources generated in this study are available from the lead contact with a completed materials transfer agreement.	
If data are publicly available, provide accession number in repository or DOI or URL.	The amplified cDNA were also quantified using Qubit dsDNA HS Assay Kit (Catalog No. Q32851 Invitrogen Life Technologies , Grand Island , NY , USA) , and all samples producing ample cDNA yields (1.7-7.76ngml) were used for library construction .	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Not detected.	

Code availability	Yes (indicate where provided: page no/section/legend)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.	Not detected.	
If code is publicly available, provide accession number in repository, or DOI or URL.	Not detected.	

Analysis

Adherence to community standards	Yes (indicate where provided: page no/section/legend)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	Not currently checked by SciScore
