SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the institutional review board (IRB) at American Institutes for Research (IRB EX00474) , with a waiver of documentation of consent .
Field Sample Permit: Before data collection , we performed a sample size calculation to determine the number of respondents needed.
Inclusion and Exclusion Criteria
Active employees working in a position with EMS duties , including front-line ambulance personnel and field supervisors , at the time of the survey were eligible to participate (n = 1,199) .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Weight: A summary of the LS7 component scoring is included in Table S1 . 4 Briefly , the ideal categories were defined as being a non-smoker or not smoking within the previous 12 months , reporting >=75 minutes of vigorous or >=150 minutes of moderate and vigorous physical activity per week , meeting recommendations of 4-5 components of the American Heart Association Healthy Diet score , BMI < 25 kgm2 , untreated blood pressure < 12080 mmHg , untreated cholesterol < 200 mgdL , and untreated fasting plasma glucose < 100 mgdL .
Randomization
Respondents were offered an incentive of a random drawing of 20 50 gift cards .
Blinding
not detected.
Power Analysis
Before data collection , we performed a sample size calculation to determine the number of respondents needed.

Replication
not required.
Cell Line Authentication
Authentication: The PSQI and PSS-10 have both been validated and used in multiple languages and settings , each with a Cronbachs a > 0.70 and test-retest reliability of > 0.70 across multiple studies .

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
