Document Identifier: **PMC8301262**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Methods Informed consent was obtained from all study participants.
IRB: The study was approved by the Oregon Health & Science University institutional review board.
Inclusion and Exclusion Criteria
Excluded were participants who self-identified as nonwhite or nonblack race (n = 48), or as black at the Washington County and Minneapolis field centers (n = 55); those with missing covariates (n = 903); and those with nonsinus median beat (n = 46).
Attrition
Excluded were participants who self-identified as nonwhite or nonblack race (n = 48), or as black at the Washington County and Minneapolis field centers (n = 55); those with missing covariates (n = 903); and those with nonsinus median beat (n = 46).
Sex as a biological variable
Study population The ARIC study is a prospective cohort that recruited 15,792 men and women (age 45–64 years) selected as a probability sample from 4 US communities.
Subject Demographics
Age: Study population The ARIC study is a prospective cohort that recruited 15,792 men and women (age 45–64 years) selected as a probability sample from 4 US communities.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.	
Code Information	
Identifiers: 10 The MATLAB (MathWorks) software code for the heart vector origin definition is provided at https://github.com/Tereshchenkolab/Origin.	https://github.com/Tereshchenkolab/Origin
Identifiers: Statistical analyses were performed using STATA MP 15.1 (StataCorp LP, College Station, TX); code is provided at https://github.com/Tereshchenkolab/statistics.	https://github.com/Tereshchenkolab/statistics
Data Information	
Availability: The ARIC (Atherosclerosis Risk in Communities) study data are available through BioLINCC (Biologic Specimen and Data Repository Information Coordinating Center; https://biolincc.nhlbi.nih.gov).

Software and Algorithms			
10 The MATLAB (MathWorks) software code for the heart vector origin definition is provided at https://github.com/Tereshchenkolab/Origin.	MATLAB		Suggestion: MATLAB, RRID:SCR_001622(link)
Statistical analyses were performed using STATA MP 15.1 (StataCorp LP, College Station, TX); code is provided at https://github.com/Tereshchenkolab/statistics.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)
	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
