SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval for this study was obtained from the Ethics Review Committee of the Medical University of Ia#i (24.06.2017), as well as from the Ethics Council of the ‘Sf.
Consent: Blood samples were obtained for autoantibody detection after each patient signed an informed consent.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The results were introduced in an Excel file with statistical analysis processing, followed by the use of Microsoft Excel, SPSS version 24.0 (IBM Corp.).	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The quantitative data were characterized through descriptive statistics; the qualitative data were characterized through frequency distributions and contingency tables, and comparisons between samples were made using the Chi-squared test.	Chi-squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
