Document Identifier: **PMC8312603**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The patient was included in a protocol to study C. difficile infection in children, approved by the ethical committee of the hospital de Pediatria, IMSS, Mexico.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Materials and methods A 12-year-old girl with a history of partial epilepsy since the age of four presented to the hospital with a persistent two-year episode of chronic abdominal pain and loss of appetite, but no diarrhea.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

Authentication: The 16S rRNA gene of Clostridium bolteae and Faecalicatena contorta were also included based on results of the phylogenetic analyses and virtual fingerprint (see above).	
Data Information	
Identifiers: DNA was extracted using DNeasy Mini Kit (Qiagen , Hilden Germany) as previously described 15,26,27 .	15,26,27
Identifiers: The genome sequences were assembled and annotated as previously described 15,16,26 .	15,16,26
Identifiers: 49.1 6348 6275 IMSS-269 SRR9298911 6,757,988 48.9 5920 5847 MGYG-HGUT-00032 NZ_CABIXC010000001.1 6,979,496 48.9 6130 5916 OM02-1 NZ_QSVU01000001.1 7,603,944	SRR9298911

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
Briefly , human cervical carcinoma cells (HeLa) were cultured in DMEM (In vitro , Mexico) , 1 inoculation into 96-well microtiter plates and allowed to reach 70 of confluency before testing , which was typically 24 h at 37degC with 5 CO2 atmosphere.	HeLa		Suggestion: RRID:CVCL_0030(link)
Software and Algorithms			
Whole-genome sequencing (WGS) was done using Illumina HiSeq 2000 with PE 150 plus index read (Illumina , San Diego , CA) .	WGS		Suggestion: Whole Genome Shotgun (WGS) Project (RRID:SCR_016637)(link)
Adapters and phiX Illumina standards were informatically removed before quality control of the reads was done using FastQC .	FastQC		Suggestion: FastQC (RRID:SCR_014583)(link)
Automated gene annotation was done with Prokka v.	Prokka		Suggestion: Prokka (RRID:SCR_014732)(link)
The tree was edited and annotated with iTOL v4 (Interactive Tree of Life) 32. 16S rRNA gene phylogenetic analysis The 16S rRNA genes were extracted from 24 Hungatella genomes using the gene prediction with Prokka annotation before aligning the sequences with MEGA 10.0 to construct a 16S rRNA phylogenetic tree.	MEGA		Suggestion: MEGA (RRID:SCR_023017)(link)
It was also identified by the Human Microbiome Project as the reference strain for this organism.	Human Microbiome Project		Suggestion: Human Microbiome Project (RRID:SCR_012956)(link)
Determination of the pan- and core-genome of the 23 H. hathewayi and the H. effluvii reported strains The ORFs annotated using Prokka (v.1.14.5) for all of the public Hungatella genomes (24 total) were used as input for pan-genome analysis using Roary v3.13.0 (https:github.comsanger-pathogensRoary) (37).	Roary		Suggestion: Roary (RRID:SCR_018172)(link)
The core genes were extracted and converted to protein sequences for an all-against-all comparison using BLASTP with by setting the sequence identity to 95.	BLASTP		Suggestion: BLASTP (RRID:SCR_001010)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
