SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics statement All procedures were in accordance with the ethical standards of the Institutional Review Board of Korea University Medical Center
Consent: Informed consent was waived because of the retrospective nature of the study.
Inclusion and Exclusion Criteria
Inclusion criteria were as follows: women who gave birth between January 2006 and December 2016 , and had undergone the National Health Screening Program for Infant and Children (NHSP-IC) visit to evaluate neonatal characteristics .
Attrition
not detected.
Sex as a biological variable
We identified all women who gave birth from January 2007 to December 2015 using the KNHI claims database.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
METHODS Healthcare system in Korea In 2000, numerous health insurance systems in South Korea have been combined into a single system run by the National Health Insurance Service (NHIS).	METHODS Healthcare		
Statistical analyses were performed using SPSS version 18 (IBM Corp . , Armonk , NY , USA) .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Clinical characteristics were compared using the t-test for continuous variables and the kh2 test for categorical variables .	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
