SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Trial Oversight The trial was approved by local and collaborating institutional review boards and reviewed every 6 months by an independent data and safety monitoring board.
Consent: All women provided written informed consent.
Inclusion and Exclusion Criteria
Women with suspected or confirmed TB disease were excluded.
Attrition
not detected.
Sex as a biological variable
METHODS IMPAACT P1078 enrolled pregnant women living with HIV at >=14 through to <=34 weeks and 6 days gestation 20.
Subject Demographics
Weight: Adverse pregnancy outcomes recorded in the study were PTD (gestation <37 weeks using the Ballard examination, when available, or obstetrical estimate), LBW (<2500 grams at birth), congenital anomaly (according to the Metropolitan Atlanta Congenital Defects Program of the US Centers for Disease Control and Prevention), spontaneous abortion (gestation <20 weeks), stillbirth (gestation >=20 weeks), early neonatal death (<7 days), and neonatal death (<28 days) 21, 22.
Randomization
Women were randomized to receive either 28 weeks of IPT or placebo.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
