Document Identifier: **PMC8315430**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All procedures involving human subjects/patients were approved by the Ethics Review Committee of Peking University (IRB00001052–11,015).
Inclusion and Exclusion Criteria
A total of 16,151 adults remained after excluding subjects who were only observed once.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: To conduct a longitudinal analysis, we focused on the valid records of older adults (≥ 40 years old), who were visited at least twice.
Randomization
It is also identical to the random-effects model, except for modeling subject-specific effects with a batch of dummy variables instead of random terms (Figure S1).
Blinding
not detected.
Power Analysis
not detected.
Replication
Number: To conduct a longitudinal analysis, we focused on the valid records of older adults (≥ 40 years old), who were visited at least twice.
Data Information

Availability: This study utilized the open-accessed CHARLS data, which is publicly available from the website: http://opendata.pku.edu.cn/.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
