Document Identifier: **PMC8318149**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics statement Our study is approved by the Ethics Committee of Universitas Ahmad Dahlan No 012006024.
Consent: All the respondents gave their consent before the study.
Inclusion and Exclusion Criteria
Participants The inclusion criteria of the respondents were active students in schools of pharmacy and willing to participate in the study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The questionnaire The questionnaire of knowledge about COVID-19 treatment and behavior and attitude of providing information about COVID-19 treatment was developed based on the information from the National Institute of Health about the treatment of COVID-199 The questionnaire was validated to sixty respondents using Pearson Correlation and reliability tested using Cronbach alpha.	Pearson Correlation
The association between students characteristics and their knowledge about COVID-19 treatment and the behavior-attitude of providing the information about COVID-19 treatment were defined using Chi-square test and Pearson correlation.	Chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
