Document Identifier: **PMC8318150**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All the collected questionnaires were completed with the consent of the students and they were given the necessary assurance that all the information will be used confidentially and only for this research.
IRB: The study was approved by the Ethics Committee of Isfahan University of Medical Sciences.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Using Morgan and Krejcie table, the number of statistical sample members was 265 who were selected using a simple random sampling method.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The research data were analyzed using SPSS 22 (IBM, Inc., Chicago, IL, USA) software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The indicators measured in the descriptive statistics section are frequency, mean, and standard deviation, and in the inferential statistics section, different statistical tests have been used depending on the type of questions (such as independent t-test, analysis of variance, and Spearman and Pearson correlation test).	t-test
	analysis of variance
	Spearman
	Pearson correlation test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
