SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Inclusion criteria for the subjects: (1) age >= 18 years old, providing informed consent (2) the ability to listen, speak, read, and write (3) must have been living in Nantong for more than one year.
IRB: This study was approved by the ethics committee of the first peoples Hospital of Nantong City, and informed consent was obtained from the respondents.
Inclusion and Exclusion Criteria
Inclusion criteria for the subjects: (1) age >= 18 years old, providing informed consent (2) the ability to listen, speak, read, and write (3) must have been living in Nantong for more than one year.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Inclusion criteria for the subjects: (1) age >= 18 years old, providing informed consent (2) the ability to listen, speak, read, and write (3) must have been living in Nantong for more than one year.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Methods Data were statistically analyzed using SPSS 21.0 statistical software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Measurement data were expressed as mean +- standard deviation (x +- SD) and evaluated using the t-test or analysis of variance.	t-test
	analysis of variance
Count data were compared using the chi-square test.	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
