SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
We used HES data from April 2006 to March 2018 to track back 5 years to exclude patients with prior implants.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: We used HES data from April 2006 to March 2018 to track back 5 years to exclude patients with prior implants.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Analysis A Kaplan–Meier plot described the 5 year mortality and median survival since the index date for each group, and log-rank tests compared the curves; due to long survival times, for ICD implants, this could not estimate the median, so a linear survival model was fitted and the mean survival time estimated.	log-rank tests
Poisson regression was used to test for changes in hospital use after the index month.	Poisson regression

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
