Document Identifier: **PMC8322538**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the hospitals institutional review board (National Healthcare Group Domain Specific Review Board 202000545) prior to the conduct of the study.
Consent: Data collected was anonymised and a waiver of informed consent had been obtained from the institutional review board.
Inclusion and Exclusion Criteria
There were no patients who were excluded or lost to follow-up.
Attrition
There were no patients who were excluded or lost to follow-up.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All data analysis was done on SPSS version 20.0 (SPSS , Inc .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
This study was approved by the hospitals institutional review board (National Healthcare Group Domain Specific Review Board 202000545) prior to the conduct of the study.	National Healthcare		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
To compare these groups , Student t-tests were used for continuous parameters and the data was presented in the form of means (+- standard deviation) .	t-tests
Student t-tests were carried out only for parameters that followed a normal distribution .	Student t-tests
Categorical parameters were compared by Chi-squared tests , and the data was presented in frequencies and percentages .	Chi-squared tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
