SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Patients Patients >=18 years of age on maintenance (>3 months of haemodialysis) dialysis with a standard regimen (three dialysis sessions per week, dialysis duration 4 h) and treated in the nephrology unit of the University Hospitals Leuven (Belgium) were considered to be eligible to participate after providing signed and dated informed consent according to good clinical practice guidelines.
Inclusion and Exclusion Criteria
Patients Patients >=18 years of age on maintenance (>3 months of haemodialysis) dialysis with a standard regimen (three dialysis sessions per week, dialysis duration 4 h) and treated in the nephrology unit of the University Hospitals Leuven (Belgium) were considered to be eligible to participate after providing signed and dated informed consent according to good clinical practice guidelines.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Patients Patients >=18 years of age on maintenance (>3 months of haemodialysis) dialysis with a standard regimen (three dialysis sessions per week, dialysis duration 4 h) and treated in the nephrology unit of the University Hospitals Leuven (Belgium) were considered to be eligible to participate after providing signed and dated informed consent according to good clinical practice guidelines.
Randomization
Patients were randomized by the envelope method to start one of two study arms and were crossed to the other study arm after six haemodialysis sessions.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using SAS version 9.3 (SAS Institute, Cary, NC, USA) and SPSS version 23 (IBM, Armonk, NY, USA).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Differences between reduction ratios were analysed using paired t-test or Wilcoxon signed-rank test, depending on the distribution of variables.	t-test
	Wilcoxon signed-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
