SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Since this pipeline provides more than one match per annotation, we only selected the first match to avoid duplicates.
Number: Since this pipeline provides more than one match per annotation, we only selected the first match to avoid duplicates.

Data Information
Availability: Currently, the dataset is not publicly available but will be released at a later date.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The main reason for selecting these text processing pipelines is the fact that they are all based on Spacy 30, a widely adopted open-source library for Natural Language Processing (NLP) in Python, allowing our codebases to be streamlined, and the annotation output to be easily compared in our evaluation as well as ingested by other work utilizing similar pipelines.	Python		Suggestion: python-bx (RRID:SCR_024202)(link)
The dictionary used in this evaluation consists of a mix of SNOMED-CT 33, ICD 910 34, MeSH 35, and RxNorm 36 extracted from the Observational Health Data Sciences and Informatics (OHDSI) vocabulary.	MeSH		Suggestion: MeSH (RRID:SCR_004750)(link)
	RxNorm		Suggestion: RxNorm (RRID:SCR_006645)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
