SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: During the program, all participants were provided with sufficient information about the purpose and experimental procedures and gave their consent to participate.
IRB: This study was approved by the International University of Health and Welfare Ethics Review Board (approval number 17-IO-189-7).
Inclusion and Exclusion Criteria
Exclusion criteria were as follows: 1) aphasia or people who found the test instructions difficult to understand, 2) individuals diagnosed with dementia, and 3) individuals under the age of 65.
Attrition
not detected.
Sex as a biological variable
PARTICIPANTS AND METHODS One-hundred and six community-dwelling individuals (66 males and 40 females) over the age of 65, who required supportcare under Japans long-term care insurance system (LTCI)15) (support level 1, level 2, or care level 1) and were receiving day care through the LTCI, were enrolled.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
SPSS Statistics version 25	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Mann-Whitney test , unpaired t-test , and kh2 test were performed to test each index between the two groups .	Mann-Whitney test
	t-test
In addition, a Chi-squared test was performed in both groups to validate the GDS-15 questionnaire items.	Chi-squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
