SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the Institutional Review Board of Ryazan State Medical University (No. 01/2017).
Consent: All subjects gave informed consent to the work.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: (1) males or females aged ≥40 years old and (2) presence of PAD.
Attrition
not detected.
Sex as a biological variable
The inclusion criteria were as follows: (1) males or females aged ≥40 years old and (2) presence of PAD.
Subject Demographics
Age: The inclusion criteria were as follows: (1) males or females aged ≥40 years old and (2) presence of PAD.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using StatSoft Statistica software version 13.0 (	StatSoft Statistica		Suggestion: STATISTICA (RRID:SCR_014213)(link)
, Palo Alto, CA, USA) and Microsoft Excel for MAC ver. 16.24.	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Comparisons were made using the Mann–Whitney U-test, as a non-parametric alternative test to the independent sample t-test, Wilcoxon test for paired samples, and Spearman rank correlation for determining any associations between two ranked variables.	Mann–Whitney U-test
	t-test
	Wilcoxon test
	Spearman rank correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
