SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study received the Ethics Committee approval, and all participants were given explicit details regarding the study and offered their consent.
Inclusion and Exclusion Criteria
Two cases that fulfilled these criteria were excluded, as they associated dextrocardia and situs inversus, respectively.
Attrition
Two cases that fulfilled these criteria were excluded, as they associated dextrocardia and situs inversus, respectively.
Sex as a biological variable
There were approximately 10 500 pregnant women examined in this period of time and our team discovered 18 RAA cases.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The classical grey scale mode combined with color, power and pulsed-wave Doppler modes were used for a detailed fetal anatomy and heart assessment, according to a comprehensive protocol previously published by our Center [20,21,22,23,24,25].
Replication

not required.	
Data Information	
Identifiers: The classical grey scale mode combined with color, power and pulsed-wave Doppler modes were used for a detailed fetal anatomy and heart assessment, according to a comprehensive protocol previously published by our Center [20,21,22,23,24,25].	20,21,22,23,24,25

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
