SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Material and Methods Study population This cross-sectional study was approved by Ethics Committee of Mashhad University of Medical Sciences, Mashhad, Iran. One hundred and twenty volunteers were included (80 with and 40 without type 2 diabetes).
Consent: Questionnaires containing past medical history, social and family history were obtained and written informed consent was obtained from all individuals.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis All data were analyzed using the Statistical Package for Social Sciences (SPSS version 11.5).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The normality of distribution was assessed by the Kolmogorov Smirnov test.	Kolmogorov Smirnov test
Categorical variables were compared using Chi-square test.	Chi-square test
Analysis of normally distributed variables is included independent-samples T tests, One-Way ANOWA tests.	T tests
	ANOWA tests
Mann-Whitney U test and Kruskal-Wallis one-way analysis of variance used for not normal distribute variables.	Mann-Whitney U test
	Kruskal-Wallis one-way analysis of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
