SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All participants will provide oral and written informed consent, either in Dutch or in their native language.
IRB: All AEs and SAEs will be recorded, and SAEs will be reported to the Medical Ethics Committee of the Amsterdam University Medical Center (UMC), location Vrije University Medical Center (VUmc).
Inclusion and Exclusion Criteria
Eligible participants will have (1) elevated levels of psychological distress measured by the Kessler-10 Psychological Distress Scale (K10 > 15 Kessler et al., 2002) and (2) reduced psychosocial functioning measured by the WHO Disability Assessment Schedule (WHODAS 2.0 > 16 WHO, 2010).
Attrition
For the process evaluation , 20 participants will be interviewed. 2.5 .
Sex as a biological variable
not detected.
Subject Demographics
Age: Participants Participants will be Syrian, Eritrean and Iraqi asylum-seeking and refugee youth, between 16 and 25 years of age, living in the Netherlands.
Randomization
Participants will then be randomized into one of the three conditions (PM+CAU, PM+EPCAU, or CAU).
Blinding
They will be blinded to the allocation of the participants and assist them during the assessments if needed.
Power Analysis
Sample size Since this is a pilot feasibility trial no power calculations have been carried out .
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
