SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Prior to testing, each participant provided informed consent which was approved and performed in accordance with the ethical standards of the Reynolda Campus Institutional Review Board.
IRB: Prior to testing, each participant provided informed consent which was approved and performed in accordance with the ethical standards of the Reynolda Campus Institutional Review Board.
Inclusion and Exclusion Criteria
Those that did not meet these inclusion criteria were excluded from the study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
All participants performed the SLHD, SLVJ, and the Keiser Air420 leg press in random order as determined by a random sequence generator.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
8 All data were analyzed once normality was assumed using IBM SPSS Statistics 25 (IBM Corporation, Armonk, NY).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Repeated measures ANOVA, with an alpha level of 0.05, was used to quantify differences between dependent means.	ANOVA
Pearson Product-Moment correlation coefficients were calculated for each testing pair and on each leg (dominant and nondominant scores for the correlation between the SLHD, SLVJ and the Keiser).	Pearson Product-Moment correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
