SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed written consent was obtained from all participants.
IRB: All experimental protocols, including blood sampling, were reviewed and approved by the Ethics Committee of the Shahid Beheshti University of Medical Sciences (IR.SBMU.MSP.REC.1397.835).
Inclusion and Exclusion Criteria
The exclusion criteria included patients with current or previous use of immunomodulating drugs or oral steroids, a diagnosis of immune-related disease, suffering from infectious diseases, and a history of any cancer-specific treatment or a concomitant malignancy within the past 5 years.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Statistical analysis was administered using GraphPad Prism version 8.	GraphPad Prism		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
ANOVA was used to compare study groups (more than two).	ANOVA
For non-normally-distributed parameters, the non-parametric Mann Whitney U test and Kruskal Wallis H test were used.	Mann Whitney U test
	Kruskal Wallis H test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
