SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Euthanasia Agents: The mice were sacrificed at 0.5, 1, or 3 days with direct inoculation of excessive isoflurane anesthesia of isoflurane.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Six-week-old, specific-pathogen-free, female BALB/c mice (Japan SLC Inc, Shizuoka, Japan) were used.
Subject Demographics
Age: Six-week-old, specific-pathogen-free, female BALB/c mice (Japan SLC Inc, Shizuoka, Japan) were used.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Organisms/Strains			
Six-week-old, specific-pathogen-free, female BALB/c mice (Japan SLC Inc, Shizuoka, Japan) were used.	BALB/c		Suggestion: RRID:MGI:2683685(link)
Software and Algorithms			
In Vitro Antibacterial Testing Two types of bacteria, S. aureus (NBRC 12732, National Institute of Technology and Evaluation, Tokyo, Japan) and P. acnes (NBRC 107605, National Institute of Technology and Evaluation, Tokyo, Japan), were used in the in vitro experiments.	NBRC		Suggestion: NBRC (RRID:SCR_002660)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Mann–Whitney U test with a 5% significance threshold was used to determine the difference of viable cells between CC and Ti.	Mann–Whitney U test
Wilcoxon rank-sum test with a 1% significance threshold was used to determine the difference of viable cells between CC and Ti.	Wilcoxon rank-sum test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
