SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Methods Participants The study was approved by a local ethics committee, and written informed consent was obtained from all participants.
Consent: Methods Participants The study was approved by a local ethics committee, and written informed consent was obtained from all participants.
Inclusion and Exclusion Criteria
The exclusion criteria included a history of shoulder and elbow injury or surgery and having any symptoms of soreness in the upper extremities at the time of the examination.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Their mean age was 26.6 years (range, 24-33 years) 8 players were infielders, 4 were outfielders, and 1 was a pitcher 13 were right-handed, and 1 was left-handed.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
The measurements were repeated 3 times on 1 day by each investigator to assess intrarater reliability.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using PASW Statistics 18 software (SPSS Inc).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We evaluated the intrarater and interrater reliability using the Pearson correlation and intraclass correlation coefficient (ICC), respectively.	Pearson correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
