SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: All procedures were performed according to the guidelines approved by the Institutional Animal Care and Use Committee at Miami University and the ARVO Statement for the Use of Animals in Ophthalmic and Vision Research.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Number: Live Imaging and Histology A total of 37 animals were used in two independent experiments.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
28 Image Processing and Reconstruction The imaging processing pipeline was customized and implemented with MATLAB (R2019a version; MathWorks, Natick, MA).	MATLAB		Suggestion: MATLAB, RRID:SCR_001622(link)
Depending on the irregularity of different tissues, 10 to 50 slices were manually segmented as the baseline for each tissue, then the rest of the interval slices were unraveled using the interpolation function from ImageJ.	ImageJ		Suggestion: ImageJ, RRID:SCR_003070(link)
These 3D four-channel images are visualized and animated using ICY software (Institut Pasteur, Paris, France; France BioImaging, Montpellier, France), and Imaris Viewer (Oxford Instruments, Abingdon, UK).	Imaris		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
